Instruction

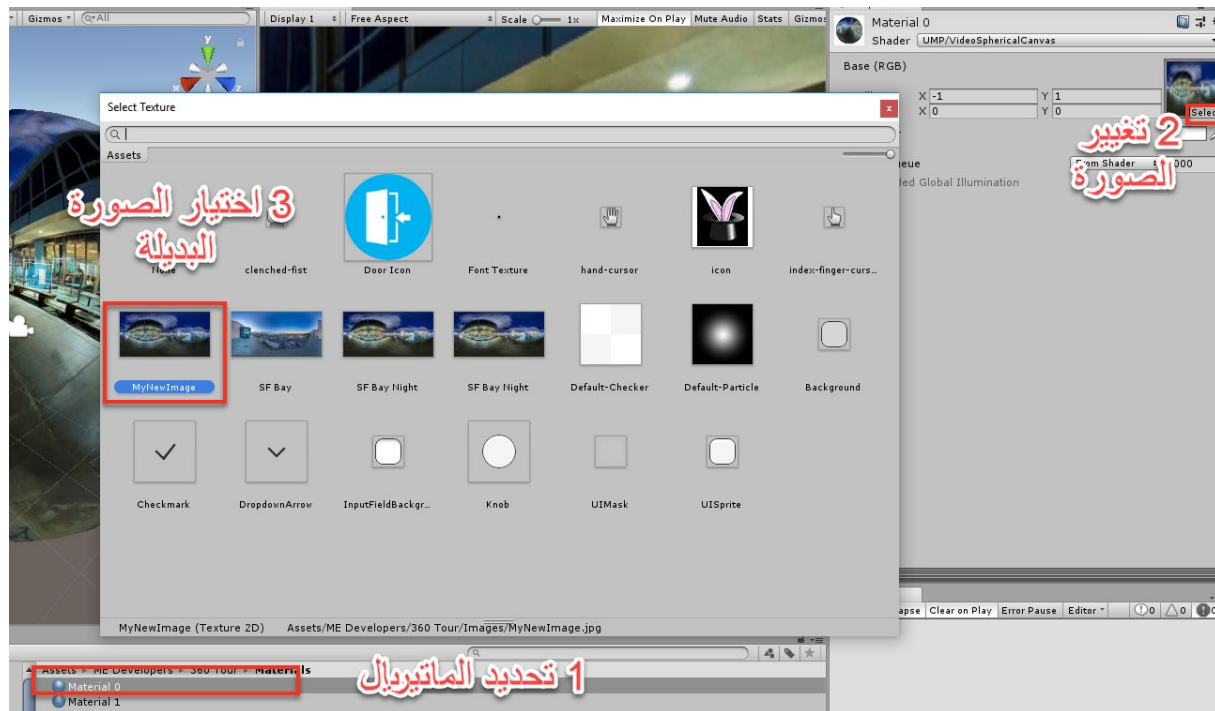

1. Add your images:

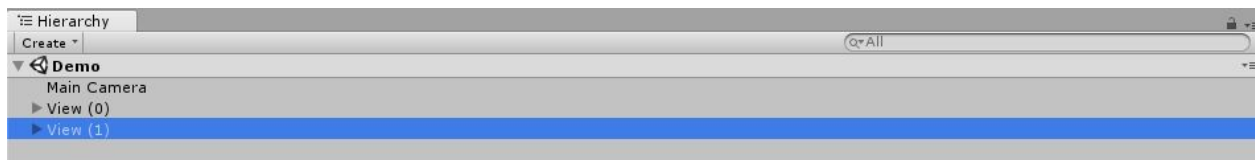

2. Open Demo scene:

3. Replace the materials Images:

4. Duplicate the number of views in Hierarchy window to match the number of materials that you have:

5. Change the View material:

6. To move between images, you will need to set the index:

First, set the button that will load the next image:

Finally, just set the photo index number from the inspector.
Note: the View number has to match the index number.
